Nano ID

English | **Русский** | **简体中文** | **Bahasa Indonesia**

A tiny, secure, URL-friendly, unique string ID generator for JavaScript.

> "An amazing level of senseless perfectionism, which is simply impossible not to respect."

- **Small.** 130 bytes (minified and gzipped). No dependencies. Size Limit controls the size.
- **Fast.** It is 2 times faster than UUID.
- **Safe.** It uses hardware random generator. Can be used in clusters.
- **Short IDs.** It uses a larger alphabet than UUID (`A-Za-z0-9_-`). So ID size was reduced from 36 to 21 symbols.
- **Portable.** Nano ID was ported to 20 programming languages.

```
import { nanoid } from 'nanoid'
model.id = nanoid() //=> "V1StGXR8_Z5jdHi6B-myT"
```

Supports modern browsers, IE **with Babel**, Node.js and React Native.
